Hundreds of novelties in children's misses, and ladies cloaks now on exhibition at Archie Reid's.

Our stock of yarns is the largest and the best, prices the lowest. Bort, Bailey & Co.

Turkish baths! Only known reliable specific in rheumatism.

Turkish baths! Incomparable for the complexion.

A new line of gent's embroidered black gloves at popular prices at Archie Reid's.

Leave your orders under the First National Bank for oaks, the cheapest fuel in the city. J. H. Gatzley.

Will sell harness of all description cheaper than the cheapest.

Jan. A. Fathers, Cor. Court and Main St.

New lot of sample corsets just received at Archie Reid's.

Turkish baths! Only known reliable specific in rheumatism.

Magnificent albums at Sutherland's bookstores.

For Rent.—New house on Rager avo third ward, convenient to small family. Apply at this office.

For Rent.—January 1st, 1888, the store No. 55, West Milwaukee street, now occupied by the west side grocery store. Enquire of Randall Williams.

LITTLE, BUT ON MY!

Doughty General Bragg, Who Appears as Counsel in the Baker Case.

The Question that he is Engaged to Argue.

When the Downes-Winslow case went to the jury this afternoon, one of the attorneys that stepped forward to listen to the opening of the often postponed case of the state against Robert A. Baker was General Edward S. Bragg. Apparently not over five feet high, he nevertheless attracted more attention than all the others in the room.

The general seems to have grown old rapidly since his last appearance in this city. He has lost the sight of one eye, and walks with a trifle slower step, but what his brother lawyers term the "obtain-lighting" expression of his face is still to be seen.

"General Bragg," said one attorney this morning, "is the most relentless questioner to be found among all the lawyers of the state. His cross-examinations are marvelous. The questions come so artfully that there is no choice between answering just in the words that the general wants or lying most infernally. I suppose that's one secret of the 'old man's' success."

The general appears in the Baker case as attorney for the defendant. He is assisted by Winslow & Hyzer, who for the state are District Attorney McCrory, of Fond du Lac, and James G. Jenkins, of Milwaukee.

Baker was in charge of the Bank of Fond du Lac at the time of its collapse. The complaint against him is that he received heavy deposits after he knew the bank to be insolvent. Many of the points involved are the same as in the case tried before Judge Conger in which Baker was the defendant and the city of Fond du Lac the plaintiff. That, however, was merely a civil action involving the recovery of certain deposits said to have been made by the city.

The light to keep this last matter out of the courts has been a stubborn one. Continuous from year to year have been taken with moonshine regularity, but this year Judge Bennett announced positively that the case must come to trial. Consequently, for the next few days the circuit court room of Rock county will be a very lively place.

It is possible that a verdict in the Downes-Winslow case will be rendered before court adjourns this evening.

BRIEFLETS.

—Ochreous entertainments are plenty.

—Another snow storm is predicted to be on the way.

—Fun for young and old at Lappin's hall Saturday evening.

—The dedication of Odd Fellows hall takes place this evening.

—Father E. M. McGinnity is now able to be about the house.

—Superintendent T. T. Croft is confined to the house by sickness.

—The greatest hit of the season at Lappin's hall Saturday evening.

—Have you seen the Garland heating stove for 1888 at Metcalf & Gowdey's?

—Prof. Severance's dancing class enjoyed a pleasant social last evening.

—Do not buy stove until you have seen the Garland, at Metcalf & Gowdey's.

—Secure your tickets at once for the entertainment at Lappin's hall Saturday evening.

—Superintendent C. H. Keyes has been appointed one of the board of visitors for the state university.

—At the Presbyterian church Propagatory Lectures and Session meeting for the reception of new members this evening.

—Janesville Chapter No. 5, Royal Arch Masons, assemble in regular semi-monthly convocation this evening at Masonic hall.

—An official report of the recent session of the county board of supervisors, will be found on another page of this paper.

—If you want a handsome stove, and one which will give the most heat from coal consumed, buy the Garland, at Metcalf & Gowdey's.

—Ed. Ehringer, the popular local comedian and German dialect "wrestler," will take part in the W. B. C. entertainment at Post hall this evening.

—Rogers' statutory will be shown at Lappin's hall for one evening only. Do not miss seeing it. Opening only, Saturday evening, Dec. 3, at 7:30 sharp.

—Yesterday Governor Rusk appointed Frederick H. Koeblin first lieutenant and Robert W. McLean, second lieutenant of the consolidated militia of Janesville.

—The members of Rook Assembly, Knights of Labor, will give a social dancing party at Apollo hall on to-morrow evening. They invite their friends to attend.

—District Attorney Malone is to be congratulated on his success at the present term of the circuit court. He has secured convictions in every case on the criminal calendar except one.

—Rock Assembly, No. 5,013, Knights of Labor, will give a social dance at Apollo hall, Friday evening December 2d. Music by Anderson's full band. Supper at the Sociable. Tickets 50 cents. Public invited.

—Joe Murphy drew an immense audience last evening to witness his presentation of "Shame Rhoe." Murphy has many friends in this city, and is sure of a warm and hearty welcome wherever he appears.

—The Oak Hill cemetery trustees have found it necessary to open up more new lots in the cemetery grounds, and are now at work with a force of men clearing the new grounds of trees and stumps.

—The Melot hears, bearing the remains of the late Mrs. Cobb, was partly wrecked this morning. It was backed against a post at the entrance of Court street, breaking the curved-glass of the house doors.

—Will the Riverside rink be remodeled and turned into an opera house for the accommodation of first class show combinations this winter? In the hands of a responsible manager it could be made the popular place for all show companies.

—Tickets are now on sale for the entertainment at Lappin's hall Saturday evening, at the following places—James Sutherland & Co., Stearns & Baker's drug store, Mr. Denniston's and Mr. Robbins'. Admission 25 cents. Children under 12 years, 15 cents. No extra charge for reserved seats.

—The young ladies of the Congregational church give an art entertainment at Lappin's hall, Saturday evening, comprising all of the different groups of "Rogers' Statuary," life size. No expense will be spared in making this one of the finest entertainments given in Janesville.

—There is no regular programme for the Odd Fellows dedicatory exercises this evening. The dedication exercises will commence Saturday at seven thirty, and at their conclusion a supper and social dance will follow. Owing to limited accommodations, none but Odd Fellows and their families will be admitted.

—Mr. Richardson, of the telephone exchange, who is putting up the fire alarm plant, is now setting the extra poles. He has prepared nearly all the telephone poles, on the line, for the reception of the wire, and as soon as the setting of about seventy-five extra poles is completed, the wire will be put up and the alarm boxes set.

—One week from Sunday will begin the regular fall season of the McCaull opera company at the Chicago Opera house, in Chicago. The company is undoubtedly the strongest that Colonel McCaull has ever brought to Chicago, it being a consolidation of his two old companies and containing all the popular favorites. The company is constituted of DeWolf Hopper, Digby Hill, Harry Mc Donough and the rest of McCaull's great company.

—The remains of the late Mrs. Sarah P. Cobb arrived in the city overland from Beloit a few minutes after eleven o'clock this morning, and were taken to Court Street M. E. church, where brief funeral services were held, conducted by the Rev. T. DeWitt Peake, pastor. The remains were then taken to Oak Hill cemetery for interment, the pall bearers being Messrs. Wm. A. Lawrence, E. Wheeler, George Hill, F. M. Hubbard and Abram Phelps. Deceased was one of the early pioneers of this city, and at the time she was taken with her fatal illness, she was returning home from a trip days the circuit court room of Rock county will be a very lively place.

It is possible that a verdict in the Downes-Winslow case will be rendered before court adjourns this evening.

STRAK CARS TESTED.

The Milwaukee & St. Paul Shows That Fires are Needed.

During the last cold snap when the thermometer ranging from twelve to twenty-eight degrees below zero, the Chicago, Milwaukee & St. Paul railway has been experimenting with steam heating for passenger trains. The experiments have proved that the system adopted by that company is a perfect success, and commencing December 1st the through trains of that company between Chicago, St. Paul and Minneapolis and on their lines will be equipped with steam heating apparatus.

The steam is taken direct from the boiler of the locomotive through a regular valve, then passes through a safety valve under the cab, which only allows low pressure steam to pass through the heating pipes and connections in cars. A direct line of pipe is laid under each car and brought up to the top and edge of the platform, where hose connections and automatic couplers are placed for passing from one car to another. This direct pipe is properly covered to prevent condensation, and is tapped by an upright pipe which communicates with radiator piping along the side in the inside of the car for the heating surface. After the steam accomplishes the heat job in these pipes the condensed water returning from it runs freely down the joints of pipes and is allowed to escape under the car by "steam expansion traps." In addition to this the provision has been made for the proper ventilation of cars with "indirect heating radiators" very similar to the stoves under floors in houses heated by steam, so that the motion of the train forces a large current of freshly heated air into the car.

MECHANICAL NOTES.

An axially composed of copper, 15 parts; tin, 2 1/2; lead, 1 and one part of antimony is said to be capable of resisting the action of acids.

A plate industry is now consuming 50,000 tons of English iron and steel a year, that would be useless for the purpose if it were not consumed in this way.

The art of paper making has reached a point where a growing crop of paper is made, made paper, and turned out as a newspaper, all within thirty-six hours.

Newsprint out from chains from the solid bar without welding is one of the recent mechanical operations that have attracted attention.

The process of rolling out a chain is similar in some respects to the method employed in casting the links and having them come out together in a chain from a mill.

An article called flexible glass is now made by soaking paper in a solution of soda ash, thus making it transparent, polishing when dry, and rubbing it with pumice stone. A layer of soluble glass is then applied and rubbed with silk. The surface thus produced is said to be as perfect as that of ordinary glass.

Electronic documents show that the plate was known at the time of the wars of Alexander the Great in the Indies. Herodotus, 450 years before Christ, described Scythians as using the plate in their wars.

The plate was used by the Scythians as a means of communication. The plate was used by the Scythians as a means of communication.
